## Project Design Phase-II Solution Requirements (Functional & Non-functional)

| Date          | 27 October 2022                               |
|---------------|---|
| Team ID       | PNT2022TMID45231                              |
| Project Name  | Personal Assistance for Seniors who Are Self- |
|               | Reliant. (Medicine reminder)                  |
| Maximum Marks | 4 Marks                                       |

## **Functional Requirements:**

Following are the functional requirements of the proposed solution.

| FR No. | Functional Requirement (Epic) | Sub Requirement (Story / Sub-Task)  |
|--------|-------------------------------|---|
| FR-1   | User Registration             | Registration through Form   |
|        |                               | Registration through Gmail  |
|        |                               | Registration through LinkedIN   |
| FR-2   | User Confirmation             | Confirmation via Email  |
|        |                               | Confirmation via OTP  |
| FR-3   | User Login                    | login through User Id and Password.   |
| FR-4   | Network Connectivity          | via wifi /mobile data.  |
| FR-5   | IBM IoT Platform              | Access cloud storage via internet and it gives medication information.                    |
| FR-6   | Node-RED                      | Uses to transfer the data from IOT platform to UI platform and helps in storing the data. |

## **Non-functional Requirements:**

Following are the non-functional requirements of the proposed solution.

| FR No. | Non-Functional Requirement | Description   |
|--------|----------------------------|---|
| NFR-1  | Usability                  | It can easily track and monitor the medication time   |
|        |                            | of users and share the information to the caregivers. |
| NFR-2  | Security                   | The cloudant database is highly secured and it        |
|        |                            | prevents data from hacking.                           |
| NFR-3  | Reliability                | The prescription of medication for users is assured   |
|        |                            | all the time.   |
| NFR-4  | Performance                | It reminds users to take their medications and get    |
|        |                            | them refilled, warns about drug interactions, and     |
|        |                            | assists caregivers in managing prescriptions.         |
| NFR-5  | Availability               | To keep track the medication of users.                |
|        |                            |   |
| NFR-6  | Scalability                | The users can set the time for their medication and   |
|        |                            | also can adjust how much medication to take within    |
|        |                            | the application.                                      |
